

Trial Preparation Consulting

Present your case with **clarity** and **impact**. A trial consultant plays a pivotal role in providing an important link between the attorney's concept and technology. The presentation of evidence is more persuasive through creative and strategic uses of technology. A growing percentage of the national jury pool is made up of younger "Generation X" and "Generation Y" jurors who are accustomed to **learning visually**. Our trial consultants will help to ensure your case is well-organized, your exhibits, videos, and graphics are presentation ready, and you are equipped technologically in the courtroom.

Graphics and Animation

Our graphics professionals will consult with you and present options and ideas to help you visually present your case. Ask us about interactive 3-D animation.

Courtroom Systems and Technology

The basic technology in a Huseby Trial Services courtroom includes a laptop, backup laptop, ELMO, projector, and a projector screen. Flat panel screens and any additional technology can be added to meet a client's needs.

Prior to trial, Huseby will visit, test and create a full courtroom schematic to diagram the best possible layout and illustrate the relationship between components.

In-trial Presentation and Technology Support

Captivate the jury with striking visuals that help illustrate and tell your story. We understand the importance of effectively communicating details and information in the courtroom. Our technicians have the ability to produce "eye-catching" demonstratives and compare up to four items simultaneously, such as documents, photographs or videos on a moment's notice.

The ability to adjust and edit on the fly...

Huseby Trial consultants are prepared and ready to adjust a presentation on the fly, scan and present newly submitted documents, or edit video clips in seconds for impeaching testimony.

Technology in Action

- "Tear out" a section of a document to focus the jury's attention
- Present exhibits in a side-by-side comparison
- Play a witness's video deposition with or without scrolling transcript text
- Overlay exhibits—great for comparing authenticity of a signature
